- **Description:**

- The Eiffel Tower, known as “La Tour Eiffel,” is one of the most iconic landmarks in the world. Located on the Champ de Mars in Paris, it was designed by the engineer Gustave Eiffel and completed in 1889 for the World’s Fair. Standing at 324 meters (1,063 feet), it offers breathtaking views of Paris and is a must-visit attraction for tourists.

- **Best Views:**

- **First Level:** At 57 meters (187 feet) above the ground, the first level offers views of the tower’s structure and the surrounding Champ de Mars. There are also exhibits and a glass floor for an exciting experience.
- **Second Level:** At 115 meters (377 feet), the second level provides excellent views of Paris landmarks such as the Louvre, Notre-Dame, and the Seine River. It’s also home to the famous Le Jules Verne restaurant.
- **Summit:** The highest accessible point at 276 meters (906 feet) offers panoramic views of Paris. On clear days, you can see up to 70 kilometers (43 miles) away. The summit also features a recreation of Gustave Eiffel’s office and a champagne bar.

- **Suggestions:**

- **Time of Visit:** Early morning or late evening visits can help avoid large crowds. Visiting at sunset or nighttime offers a unique perspective as the city lights up.
- **Photography:** For the best photos, consider visiting Trocadéro Square, located directly across the Seine from the Eiffel Tower, especially during sunrise or sunset.
- **Dining:** Consider dining at one of the tower’s restaurants, such as 58 Tour Eiffel on the first level or Le Jules Verne on the second level, for a memorable experience.
- **Accessibility:** The Eiffel Tower is accessible to people with disabilities, with elevators available to the first and second levels.

- **Arrival Time:** Aim to arrive at least 30 minutes before your scheduled time if you have booked tickets online. This allows time for security checks and navigating the grounds.
